Food and Drug Administration

Dear Hiring Team,

I am writing to express my interest in the Investigator I position with the U.S. Food and Drug Administration (FDA). With a Bachelor of Science in Computer Science from California State Polytechnic University, Pomona and current graduate study toward a Master of Science in Computer Science at the Georgia Institute of Technology, I bring a strong analytical and technical background that I am eager to apply in support of the FDA's mission to protect public health.

My academic and professional experiences have equipped me with strong skills in data analysis, problem solving, and technical documentation. Through my work with programming languages such as Python and database technologies such as SQL and MySQL, I have developed the ability to analyze complex datasets, identify irregularities, and document findings clearly and accurately. These skills align closely with the responsibilities of an FDA Investigator, including evaluating documentation, reviewing operational processes, and preparing detailed reports that support regulatory compliance and investigative findings. My technical training also enables me to evaluate systems, processes, and digital records with a methodical and investigative mindset. I am particularly interested in applying data-driven approaches to support inspections, investigations, and regulatory analysis, helping ensure that organizations comply with federal laws and maintain high standards for safety and quality.

I am especially drawn to the FDA's critical mission of safeguarding consumers and patients by ensuring that products meet strict regulatory standards. I would welcome the opportunity to contribute my analytical skills, attention to detail, and commitment to public service as part of the FDA's investigative team. My mother also currently works for the FDA as a microbiologist and I have been exposed to the FDA's work since I was little. I believe I can be an asset to the FDA.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and skills can contribute to the important work of the Food and Drug Administration. Please feel free to contact me at petertrinh2931@gmail.com or (714) 902-7128.

Best regards,
Peter T. Trinh
