Sept 2019 - Dec 2019	OxCord Player Front-end Developer ▪ Web service that utilizes a dynamic queue to allow multiple users to queue music or videos into a playlist individually MERN stack implementation that utilizes (DynamoDb, React, Node.js)

TEACHING EXPERIENCE

Aug 2019 - Dec 2022	Coding Instructor & Curriculum Developer, Coding Minds Academy, Irvine ▪ Instructed students between the grades of 5th to 12th on computer science ▪ Classes instructed included: Python 1 & 2, Cyber Security, Artificial Intelligence 1 & 2, USACO 1 – 3, Research Project, Roblox, and Lego Arduino ▪ Class curriculum developed: Artificial Intelligence 1, Cyber Security, USACO 3
Jan 2019 - May 2019	Middle School After School Programming Teacher Source Code Broncos Start-Up - Pomona, CA • www.sourcecodebroncos.com • Teaching 7th and 8th grade students Mobile App Development and Python • MIT App Inventor • Minecraft using Python
Sept 2018 - Dec 2018	Volunteer Teacher Cal Poly Pomona Ignite - Pomona, CA • Teaching 7th and 8th grade students Mobile App Development • MIT App Inventor

PROJECTS

Aug 2025 - Dec 2025	Mentor Chat App – UX/UI & Health Equity Prototype (Figma) • Designed a high-fidelity Figma prototype for a culturally responsive mental-health peer support app for Black and Latino adolescents experiencing Major Depressive Episodes (MDEs). • Translated qualitative research and a key informant interview with a clinical researcher into concrete requirements focused on trust, cultural safety, and accessibility. • Created dual user flows (mentor and mentee) with role-specific interfaces, dashboards, and safety protocols for peer mentorship and crisis escalation. • Designed secure 1-on-1 messaging, reflective journaling, and mood check-ins to support sustained emotional reflection. • Applied UX principles for low digital literacy and limited access, including simplified navigation, minimal text, and mobile-first design.
Jan 2025 - Apr 2025	Medication Tracker • Smart Reminders: Alerts users to take medications on time, with snooze options (15 min, 30 min, 1 hour, repeating alarms). • Calendar View: Allows users to visualize and manage their medication schedule across multiple days. • Persistent Storage: Integrates Room database to store medication history and ensure data is retained. • Medication Search: Uses the RxNorm API to retrieve detailed drug information, including generic/brand names, dosages, side effects, and SNOMED codes. • Dynamic Updates: Automatically adjusts alarms and notifications when medications are added, removed, or updated. • Tech Stack: Java (Android Studio), Room (Jetpack), RxNorm API, Broadcast Receivers / AlarmManager, Notification UI
Aug 2018 - Nov 2018	Woodbridge Pickup • An app designed to track school traffic during rush hour for students and parents • Utilizes raspberry pi stations and HC-SR04 distance sensors to track traffic, calculates time using a database
